

## Amazon Accelerator Product Restrictions Policy

We focus our efforts on providing a wide range of Amazon-exclusive selection that customers will love, and providing a unique path for selling partners to become an Amazon-owned brand supplier. We are always working with selling partners to offer high quality and safe products to our customers. As part of our ongoing efforts, the Amazon Accelerator program has chosen to restrict select product types in addition to those restricted or prohibited by law or broader Amazon policies. Please review the below list of the products that are not eligible for the Accelerator program before joining the program and launching your selection.

Accelerator reserves the right to determine the appropriateness of products sold in the program, and remove any listing at any time. If you supply a product in violation of our product restrictions, we will take corrective actions including but not limited to immediately removing listings and terminating Accelerator participation.
