

The healthy inventory workout

With the right routine, there's no limit to what you can sell.

Warm up

Check your IPI score

This metric measures your FBA performance, so you know what's working and what needs to improve.

[Check score ›](#)

Revise product settings

Get your supplier lead time and reorder frequency up to date and we'll send you custom recommendations.

[Update settings ›](#)

Remove aging inventory

Drop some weight by automating the removal of outdated items to help improve sell-through and avoid long-term storage fees.

[Remove inventory ›](#)

Work out

Clear excess inventory

Keep your on-hand inventory levels lean and mean by marking down or removing products.

[Manage inventory ›](#)

Fix inactive listings

Get stranded inventory up and running again by adding in missing product and pricing info.

[Fix stranded inventory ›](#)

Promote your products

Stretch your dollars and sell more with high-visibility placements of targeted ads.

[Advertise on Amazon ›](#)

Price to win

Stay competitive by automating price changes based on sales. A small change in price can help boost your sales.

[Adjust pricing ›](#)

Recover

Track your progress

Daily reporting and analytics help you find more ways to boost performance and plan for what's next.

[Track performance ›](#)

Refuel

Restock and refresh

Bounce back by keeping top sellers in stock and ready to buy. Send seasonal products in time for peak selling periods.
