4. What should be done for ‘bundles consisting of different products’ or products like ‘shavers’ where PPU may not be required?

All products sold within the Consumables Larger Product types need to have ***unit_count*** and ***unit_count_type*** filled. There are automated rules that decide whether a product needs to show PPU or not as mentioned in FAQ2.

Note: We recommend using these default values only if you are sure that the products do not need PPU.
