

Promotional tools and how to use them

Chapter 3

When customers find that a purchase is eligible for a promotional offer, it may increase their probability of making a purchase, especially during Prime Day, Black Friday, and other peak sales periods. Therefore, Amazon makes promotions a regular feature of the website. Sellers on each store can use a variety of promotional tools to create special offers according to their store's operational needs and product sales, combined with customer preferences and holiday distribution across various countries. This section details how you can use Amazon's in-site promotion tools and peak season campaigns to boost sales, strengthen store operations, build your brand, and increase conversion rates.

- **Fees for Prime Exclusive Discounts:**

Prime Exclusive Discounts are free promotional tools, and Amazon does not charge fees other than standard shipping fees and referral fees when you create the campaign.

- **Considerations when using Prime Exclusive Discounts:**

- Amazon periodically checks whether items in discounts are eligible to qualify for the discount and will remove the discount once your items are no longer eligible. The Prime Exclusive Discount will be automatically reactivated when the item is eligible again.
