

FBA Shipment Checklist

At Seller's Premise:

Seller Name:
Shipment ID:
Date:
Boxes:

Tick the following after checking every point:

<input type="checkbox"/> MRP visible on all units. If there is any prep/material: MRP is present on the outermost package. For a combo pack: single MRP label of the combined price. Note: FCs will not open the package and check for MRP.
<input type="checkbox"/> There must only be 1 scannable barcode. FNSKU label is covering the UPC/EAN. Every unit has a scannable FNSKU label. Labels printed from Seller Central to ensure the barcode is GS1 compliant. Note: Some 3 rd party barcode generating sites are not GS1 compliant and non-GS1 barcodes are not scannable using FC scanners. If the barcode is non-compliant, it will lead to rejection of a shipment or temporary suspension of shipment creation privileges.
<input type="checkbox"/> The units are labeled with 2D/transparency code in cases where the ASIN is enrolled for Transparency. Note: If the ASIN is enrolled for transparency but units do not have the 2D barcode pasted on it, the units will be moved to unsellable.
<input type="checkbox"/> FBA label printed on A4 size sheet for each ATS carton. Note: Non-standard size labels (smaller than A4 size) are unscannable leading to delay in receiving and cross receive of inventory. (No photocopy of shipment labels)
<input type="checkbox"/> ASIN level quantity in a shipment is an exact match with the PO. Note: Unexpected items and Additional quantity will lead to delay in receiving.
<input type="checkbox"/> If the product has expiry details, it must be visible on the outermost package of all units. Additionally, the listing has been updated with expiration attributes. Note: Updating the listing with expiration attributes can be found in this help page
<input type="checkbox"/> Physically checked the units' availability to promised quantity
<input type="checkbox"/> Quality check for every item received from source/ manufacturer
