

Appendix 1

Sellers opting for FBA model should have FSSAI license for their APOB at Amazon FC, with kind of business as Retailer.

- For a Seller to do FBA for food products and get FSSAI license, following would be necessitated:
 - Apply to State Food Safety Authority on “Form B” for State License, with ‘Kind of Business’ specified as “Retailer”[4].
 - Mention all the food products intended to be sold in the Application form B.
 - Use the VAT certificate with FC address as “Proof of doing business” for submitting to State Food Safety Authority.
 - In event the VAT certificate does not have the FC address but the “Seller’s Principle address”, the Seller should have the FC address first incorporated as “Branch address” or “Additional Place of Business (APOB)” as the case may be in some states and use that to give “proof of premises” along with the application.
 - Regarding another important requirement viz. “Form 9” pertaining to “Nominee” that has to be filed along with the application, the Seller has to fill in details of its own organization representative or ‘Proprietor’ himself, if the Seller is a Proprietor.
