Product types and size tiers

Use the following table to determine product type:

- Standard-size: A packaged unit that weighs 12 kg or less, measures 45 cm or less on its longest side, 34 cm or less on its median side, and 26 cm or less on its shortest side.
- Oversize*: A packaged unit that exceeds any of the following measurements is oversize: 12 kg, 45 cm on its longest side, 34 cm on its median side, or 26 cm on its shortest side.

To identify your product's size tier, take its dimensions (in centimeters) and its shipping weight (in grams), and compare them using the table below. If your product's package dimensions on any side or its shipping weight exceed any of the maximum values listed, move to the next largest tier.

Shipping weight is equal to the weight of your unit or units plus our packaging weight.

	Maximum length (cm)	Maximum width (cm)	Maximum height (cm)	Maximum shipping weight (g)	Packaging weight (g)
