

FBA fulfilment fees for Amazon.sg orders

The Fulfilment by Amazon (FBA) fee is a flat fee per unit, based on the size and weight of the item. First, determine the size tier for your product (envelope, standard, or oversize). Next, use the tables below to determine which fee schedule will apply. Finally, calculate the fulfilment fee according to the product's shipping weight (details below).

Rates below apply to all items (media and non-media). Applies to domestic orders.

FBA fulfilment fees

To use the chart, simply take your **product's dimensions (cm)** and its **outbound shipping weight (g)** and compare them with the first row in the table below. If your product's package dimensions (any side) or shipping weight exceed any of the maximum values listed, move to the next largest tier (row).

Note: Amazon may verify the weight and dimensions of a product using representative samples. Amazon's information about a product's weight and dimensions will be used to calculate fees in the event that there is a difference between Amazon's information and a seller's information. Amazon may change its information about a product's weight and dimensions from time to time to reflect updated measurements. Fees based on the weight and dimensions of a product are calculated using Amazon's information about the weight and dimensions of that product at the time the fee is calculated.

Shipping weight (g) = your unit's weight + our packaging weight

Shipping weight equals your unit's weight plus our packaging weight. The shipping weight total is rounded up to the nearest 1 g. Our packaging weight will be: small envelope, 20 g; standard envelope, 40 g; large envelope, 40 g; standard parcel, 100 g; and 240 g for small oversize, standard oversize and large oversize items.

The FBA fees are inclusive of GST. The examples above are only a guide in evaluating FBA. Amazon does not warrant the accuracy of the calculations.
