

Why the name DUO?

The DUO is the first SodaStream Sparkling Water Maker to be compatible for both glass and reusable plastic SodaStream bottles. The name DUO comes from the dual use.

What is the difference between the two-cylinder systems?

The new Quick Connect pink-handle system, which is compatible with our DUO Sparkling Water Maker, offers a new and effortless way to insert and remove your gas cylinder without the need to screw it into the Sparkling Water Maker. You no longer need to check if the cylinder has been tightened enough or too much.

Are existing products (bottles, cylinders) compatible with the new DUO?

The DUO Sparkling Water Maker can be used with our dishwasher-safe 1L glass carafe and our regular 1L Fuse bottle.

The 1L classic bottle, the 0.8L glass carafe (from the Crystal), the 0.5L bottle and My Only Bottle (0.5L) are not compatible.

The DUO Sparkling Water Maker can only be used with the SodaStream Quick Connect Cylinder. The blue screw-system cylinders are not compatible with the DUO.
