

DJI MINI 4 PRO

notes:

* All data was tested using a production model DJI Mini 4 Pro in a controlled environment. Actual experience may vary depending on the environment, usage, and firmware version.

** All videos and images on this page were shot in strict compliance with relevant local laws and regulations. Demos are for reference only. Always observe local laws and regulations and ensure the aircraft has obtained relevant certifications before flying.

1.The actual product weight may vary due to differences in batch materials and external factors. Registration is not required in some countries and regions. With the Intelligent Flight Battery Plus, the aircraft will weigh more than 249 g. Always check local laws and regulations before use.

2.Measured in an outdoor, open environment, without interference, and with FCC compliance. The above data shows the farthest communication range for one-way, non-return flights. Always pay attention to RTH reminders in the DJI Fly app during your flight.

3.Measured at a constant speed of 21.6 kph in windless conditions. With the DJI Mini 4 Pro Intelligent Flight Battery, the aircraft can fly for up to 34 minutes. The Intelligent Flight Battery Plus extends the flight time to 45 minutes but is not sold in Europe. Do not use the Intelligent Flight Battery Plus in Europe. Always check and strictly abide by local laws and regulations before flying.

4.Achieved with QBC (Quad Bayer Coding) techniques that combine four pixels into one. Not supported when shooting 48MP photos.

5.Supported when shooting 12MP photos only. Not supported when shooting 48MP photos.
