

Z6 Player Update Log

www.phinistec.com

Thanks for selecting Phinistec music player model Z6, we will keep the updating the firmware of the player to improve product quality and user experience, please check the update log below and contact our support team (support@phinistec.com) for the newer firmware version if needed.

In July 2023, our product hardware was fully updated, such as middle frame, silk screen, built-in hardware, to give you a brand new Z6 player.

Basic version: V2.0 07-28

Nov, 2023, update V2.0 2023-11-16:

1. corrected few translation errors.
2. added Japanese in language option.

Jan, 2024, update Z6 V2.1:

1. solved the problem of songs not playing randomly in folder mode
2. improved fm radio volume issue.
3. improved the problem of the fm radio volume incrementing too much.

Currently, we are working for a big step forward to version V2.2, please do not hesitate to contact us if you've got an idea on the new firmware.

How to update firmware:

please contact our customer support team (support@phinistec.com) and let us know your current firmware version before getting the latest firmware pack(about 19mb).

1. unzipped the firmware pack
2. there are 3 file, drive tool/flash tool guide/z6 firmware
3. upgrade according to flash tool guide.(END)
