

All of Thermos products are BPA free. Thermos carefully choose the best available materials and produce products with consistent quality and reliable performance. Thermos ensure the excellence of their range of products available by testing for quality throughout the entire manufacturing process and stand by them 100%.

The freeze boards contain non-toxic aqueous liquid, 95% water, 0.4% CMC and 0.1% Acticide MBL. There are no harmful chemicals or materials within any of our products.

These tough freeze blocks are great to use in both hard cool boxes and soft cool bags. The exterior is polypropylene with a heat sealed-cap.

Prior to use, the freeze boards should be placed in the freezer overnight, and then placed in either the cool bag or cool box. Please note the Cool Box will not keep items frozen.
