

FLESHLIGHT®

THE #1 SELLING MALE SEX TOY IN THE WORLD!

User Manual for All Masturbators

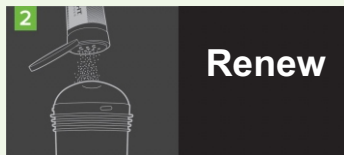

Prepare

Remove and discard the shipping rod if present (not all units ship with a rod). For a more realistic experience, use the Fleshlight Sleeve Warmer to get your inner sleeve to a skin-like temperature.

Generously apply lubricant to yourself and the Fleshlight. **ONLY USE WATER-BASED LUBRICANTS SUCH AS FLESHLUBE™.** Lubricants that are oil- and silicone-based will deteriorate the sleeve. **NOTE:** Be sure to keep yourself constantly lubricated.

Upon insertion, you can unscrew the end cap of the Fleshlight case to open the airflow, which adjusts the level of desired suction. Your new Fleshlight is now ready to use - simply manipulate the device as you would your hand.

Renew

To clean your Fleshlight, remove the sleeve from its case and run warm water through it to clean out any remaining fluids. For a thorough cleaning, apply a few sprays of our Fleshlight toy cleaner spray before rinsing. **NOTE:** Never use any toy cleaner that contains soap or detergents as those will deteriorate the sleeve.

After cleaning, shake off excess water and allow to air-dry. **NEVER** put away your Fleshlight wet. After the sleeve has dried completely, apply Fleshlight Renewing Powder to give it a skin- soft texture.

WARNING: Do not place or leave Fleshlight sleeve on any porous surfaces because oil may migrate in to porous surfaces, including, but not limited to, unsealed wood, stone and / or fabric.
