Care Instructions

Care

When you wash your sheets remove and launder any duvet cover as well.

Washing

Have your comforter professionally laundered every three to five years. Non-professional laundering is not recommended for the following reasons:

- Home washers are often too small.
- Most household washing machines have an agitator in the center, which places unnecessary stress on the comforter.
- Harsh detergents and heat can damage the fiber fill by causing it to become dry and brittle.
- If the product is not dried completely, the fiber fill will not properly function.

If you decide to wash your comforter yourself be sure to follow these instructions:

- Wash your comforter alone.
- Do not overload the washing machine.
- Wash in cold water using a non-chlorine bleach detergent on a gentle cycle with a cold water rinse
- Dry on a low heat drying cycle.
- Be sure to dry the comforter completely—this may require eight to twelve hours of drying.
- Products must be dried in a machine. Line drying is not recommended.

Upkeep

Fluff your comforter each time you make your bed. By providing a steady flow of air, your comforter will continue to loft.

Redistribute your comforter fill as needed for baffle box designs. To redistribute the fill of your comforter, lay your comforter on a flat surface and push the down in place with the heel of your hand and forearm.

Storage

Store your comforter in a cool, dry, well-ventilated area. Comforters stored long-term should be wrapped in white cotton or acid free paper. Avoid storing in plastic bags or boxes, which can cause permanent yellowing.
