Users Manual

48 protective hand cream

The cream protects your hands while working and efficiently nourishes them after washing. It is indispensable at home, while working and whenever your hands are exposed to unwanted influences from the environment.

The cream forms a thin invisible layer, which protects the skin from damaging substances and dirt. The element O-48G protects the skin from aggressive substances. It contains a glycerin ester of a vegetal unsaturated fat acid that is adapted to the biological skin condition. The protective layer that gets formed by this substance does not hinder the natural breathing of the skin. The cream has a skin friendly pH value an it preserves the natural fattiness of the skin.
