Misby coffee warmer

model:W1-A

一． Product Description

Drinking water in life is either too cold or too hot.. Clinically proven the human body needs to drink right temperature water, and 125℉-131℉ is the most suitable for human esophageal and oral health. The coffee cup warmer is designed to solve this problem.

二． Use instruction

① **Check**. Put the heating plate on a flat table, then Plug the power cord into a power outlet, Press the heating base gently by hand and observe whether the indicator light is on to ensure the product can work properly.

② **keep warm**. Place your cup on the heating area of coffee warmer base, then the Indicator light on, start the working state of constant temperature.

③ **Turn off.** When needn't keep your beverage warm, take your cup away, and the micro-gravity switch disconnects the power supply and stops heating automatically, The blue light will turn off.

④ **Explain.** If it is filled with hot beverage, the beverage temperature will slowly drop to 125℉-131℉. If it is filled with cold beverage, the beverage temperature will be slowly heated to 125℉-131℉. Heating temperatures vary depending on the external environment.

三. Features

①This cup warmer adopt gravity switch technology. Just put your cup on the heating plate and it will heat up automatically. When you take the cup away, it will shut off immediately. You don't have to worry about forgetting to turn on or off the machine anymore.

②In order that you can use this product conveniently without worrying about safety. The power of this heating base is only 16 watts, which is the international safe voltage standard. So even if you use the heating plate continuously for 24 hours, there will be no safety problems. You don't need to unplug the power cord when you don't need it. You can keep it connected all the time.

③The heated part of this product is made of imported tempered glass panels. You don't have to worry about will breaking it, and you can clean it very conveniently.

四. How to maintain

- Please unplug the power before cleaning and let it stand for five minutes before cleaning.
- The surface of the product can be wiped with a rag dipped in a little detergent.

五. Warmer Notice

① This heating plate can't boil water, only heat your drink to 125℉-131℉, which is also the most suitable temperature for human consumption.

② The most suitable use of this product is to put excess beverage you drink, such as coffee, milk, etc. on it. It's convenient for you to drink at any time without worrying about being too cold or too hot. You don't have to waste time cooking a new drink when you just want a small drink as well.

③ If the drink in your cup is very cold, it may need take 10-15 minutes to heat up.

六. Common problem

① Does not work, the indicator light does not light up.
Check whether the power supply connected and whether the plug is loose.

② Indicator lights flashing.
Check whether the desktop is flat and if there is anything under the microgravity

switch.

④ The indicator light on, but the heating panel not hot.

It takes some time for the panel to heat up, and it takes about five minutes to heat up.

⑤ The temperature of the beverage in the cup is low.

Place the cup on the heating area of the base and use lid to cover the cup.

六. Product parameters

Cord length: 47in.

Wattage Output: 16 watts.

Material: Plastic&tempered glass panels

Rated voltage: 120V-50Hz
