

1:10 SCALE LEGEND RC CAR

FAQ

FREQUENTLY ASKED QUESTIONS

LAEGENDARY

QUESTION	ANSWER
Is there any warranty for the motor, ESC, or Remote Controller?	Yes, we warrant the Motor and ESC for 6 months and Remote Control for 1 year.
How do I fix the Wheel nuts so they will not come off?	Please tighten the locknuts before and after each play. They could be loosened while driving because of the car's power and speed. A small amount of glue or a Locktite Threadlocker could be applied to prevent them from coming off.
How does the USB Charger work?	The USB charger works this way: a) The power light turns red when plugged in the outlet b) The green light flashes when the battery is connected, c) The green light turns solid when charging is complete
Can you drive it on the water?	Our 1:10 LEGEND truck has IPX4 water-resistant level. It can take splashes from different directions but can not be fully submerged into the water.
What is the biggest battery that can fit on the LEGEND?	Bigger batteries will not fit in the compartment, but they can be secured to the car by using a Velcro strap. Please note that the maximum specs should be 2S-7.4V 30C.
Does Legendary stand by and help if the battery goes bad?	Batteries are consumable parts and may run out anytime. We do offer a 1-month warranty for the batteries. Also, please note that Li-Po batteries are always a fire hazard. Thus, they must be used with caution. We have included a battery bag in the package for safety purposes. It must be used to safely charge, store or transport the batteries.
How long does it take to charge up the battery?	It can take 60-90 minutes for a complete charge, or up to 120 minutes, depending on the power source.
What is the purpose of the small battery connector? Is it to use both batteries at once?	Yes, the battery connector is used so you can install both batteries at the same time. It will give you an extended run time without the hassle of changing the battery when it wears out. The car will automatically use the 2nd battery once the first battery is out of power.

QUESTION	ANSWER
Is it possible to run multiple RC Cars at the same time without interference between them?	You can run two or more of our RC off-road cars at the same time, with no radio frequency interference. Simply pair the first truck with its remote and drive. it for a minute, then turn on the second one and drive.
What type of batteries the Remote Control uses?	You will need 3 AA Batteries to use the remote control, they are not included in the package.
Can I run the LEGEND on sand?	Yes, you can drive it on sand but we recommend that you clean your RC car thoroughly after driving it to make sure that there are no particles stuck inside.
What is the size of the tires?	This is the tire's size: 4.5 inches in length and 2.5 inches width inside in diameter.
Can I buy a different body for it?	Yes, we have 4 different colors available: Black/Red, Blue/Yellow, Red/Orange, and Purple/Yellow. We also have a clear plastic top which you can customize according to your own preference.
Does it have proportional steering and throttle?	Yes, you can control the speed and steering proportionally from the Remote Control, but you also have an option for low and high speed.
Where do you order replacement parts for the truck?	You can purchase the replacement parts for the LEGEND truck at this link - https://www.amazon.com/dp/B07VY5C4X1
Is there a brushless version of this truck?	Please be advised that there is no brushless version for the 1:10 LEGEND truck.
What is the speed of the LEGEND in the low-speed setting?	The low-speed setting of our LEGEND truck is about 26km/h. You may also adjust the steering throw so the car's movement will be limited.
