

2-IN-1 Bluetooth 5.0 Audio Transmitter Receiver Adapter User Manual

Model: ZF-169

Dear friends, thanks for choosing our products. In order to better use the functions of this product, please read this user manual before use.

1. Two Modes

(1) Transmitter Mode

Wireless transfer audio from your non-Bluetooth media devices (such as PC, TV, CD / DVD player, Projector) to your Bluetooth headphones or Bluetooth speakers via 3.5mm audio cable.

(2) Receiver Mode

Wireless transfer audio from your Bluetooth-enabled phone / tablet / gaming machine to your non-Bluetooth headphone / speaker / car stereo system via 3.5mm audio cable.

2. Mode Switching

Simply unplug the adapter from the USB power port and plug it back in again within 3~10 seconds to switch modes.

Blue light in receiver mode, red light in transmitter mode.

***Note:** If the device has been in a mode for a long time, it needs to be re-plug twice to switch to another mode.

3. Pairing Method

(1) TX - Transmitter Mode

- 1) Plug the adapter into USB port, red light flashes.
- 2) Use 3.5mm audio cable to connect the audio equipment (for example, TV) and the adapter.
- 3) Turn on your Bluetooth headphones or other Bluetooth device, your audio equipment (for example, TV) will automatically pair with it, and red light will stays on after pairing succeeds.

(2) RX - Receiver Mode

- 1) Plug the adapter into USB port, blue light flashes.
- 2) Use 3.5mm audio cable to connect your audio equipment (for example, Car stereo) and the adapter.
- 3) Search for 'ZF-169' on your phone's Bluetooth list for pairing, and blue light will stays on after pairing succeeds.

4. Charging

During use, power must be supplied through USB port (such as power adapter, PC, car charger and other USB port).

5. Compatibility

Suitable for non-Bluetooth TV, PC, CD / DVD player, MP3 / MP4 player, Projector, Car Stereo, headphone, speaker, etc.

Input Interface: micro USB

Input: 5V/1A

Connection Distance:33-50ft (depending on the using environment)

Product Size: 1.3 x 0.7 x 0.3 inches

Product Weight: 0.1oz

7. Package

1 x Bluetooth Transmitter Receiver

1 x 3.5mm Audio Cable(1.6ft)

1 x User Manual

8. Note

- Just can transfer audio, Image/file transfer are not supported.
- Only one device can be connected at a time.
- Phone calling are not supported.
- 3.5mm audio cable is used to transfer audio.
- USB only has power function, so it doesn't need drivers and can't be recognized by the computer.
- The volume can only be adjusted through the music player, not the computer system. When using 3.5mm audio cable to connect PC (projector, CD player, etc.), you can adjust the system volume.
- When pairing with Bluetooth headphone/speaker, turn off Bluetooth of nearby Bluetooth devices to avoid affecting pairing.
- When using, please make sure that the USB interface is inserted into the deepest place.
- The transceiver can switch modes after the status light of the receive or transmit mode flashes.
- If the transceiver has been in receive / transmit mode for a long time, you need to unplug it and plug it twice to switch to another mode.

9. After-sales Service

Providing 45-days refund, 12-month warranty, 24-hours response service. If you have any questions or need technical support, please do not hesitate to contact us by email.
