Genuine Water Filter

How Our Trusted Filters Work to Keep Your Water Clean

Our Frigidaire filters are so effective at reducing contaminants found in water because of the carbon block inside the filter. The specially prepared carbon is incredibly porous, giving it tremendous surface area to capture microscopic particles.

3 LEVELS OF FILTRATION

LEVEL 1

- As the incoming water passes through the carbon block, the larger particles get stuck outside surface. This removes sediment from the water.

LEVEL 2

- Some impurities, like chlorine, are reduced by a rapid chemical reaction upon contact with the carbon. This improves the taste and smell of the water.

LEVEL 3

- Then, the carbon block acts as a magnet for compounds like lead and VOCs, trapping the contaminants. This reduces potentially harmful substances found in water.

The resulting filtered water is now ready to be dispensed.

Frigidaire PureSource 2® WF2CB

Product Description

- The PureSource 2® filter works with your Frigidaire refrigerator to give you clean, great tasting water and ice. It improves the taste of your water and reduces contaminants including lead, mercury, toxaphene, alachlor, atrazine, and lindane. It's easy to install the PureSource 2® . Press the release button to remove your old PureSource 2® filter cartridge, then slide and click the new filter cartridge into place.
- The PureSource 2® filter lasts 6 months or for 400 gallons, whichever comes first.
- Frigidaire PureSource 2® is a cassette filter designed for use in select Frigidaire refrigerators with filtration systems located in the front, top right.

Genuine Frigidaire Filter

- For guaranteed performance, only use Frigidaire genuine water filters.
- Imitation filters may display a lower price and claim to be compatible with Frigidaire refrigerators, but only Frigidaire genuine filters are guaranteed by Frigidaire to deliver quality water filtration at Frigidaire's specifications.
- Our Frigidaire Water Filters are tested rigorously to guarantee that they reduce contaminants, such as lead. So, not only do our filters provide you with fresh tasting water, they also ensure that your water is more pure and clean.

NSF Certified

- Using a consensus based process, NSF creates standards, test and certifications for food and water industries. The internationally recognized independent organization works to reduce the negative effects that unsafe products and processes have on our health and environment.
- PureSource 2® carries the following NSF Certifications for refrigerator water filtration:
 - Standard 42: Certified to reduce chlorine taste and odor (and potentially chloramines, iron, manganese, hydrogen sulfide, pH neutralization and zinc reduction)
 - Standard 53: Certified for critical health claims (heavy metals, inorganics and volatile organic chemicals)

Frigidaire PureSource® 3 WF3CB

Product Description

- The PureSource® 3 filter works with your Frigidaire refrigerator to give you clean, great tasting water and ice. It improves the taste of your water and reduces contaminants including lead, mercury, toxaphene, alachlor, atrazine, lindane, chlorobenzene, atenolol, ibuprofen, and trimethoprim. It's easy to install the PureSource® 3. Push and release your old PureSource® 3 filter, then push your new filter into place.
- The PureSource® 3 filter lasts 6 months or for 200 gallons, whichever comes first.
- Frigidaire® PureSource® 3 is designed for use in select Frigidaire side by side refrigerators with filtration systems located in the back, top right.

Genuine Frigidaire Filter

- For guaranteed performance, only use Frigidaire genuine water filters.
- Imitation filters may display a lower price and claim to be compatible with Frigidaire refrigerators, but only Frigidaire genuine filters are guaranteed by Frigidaire to deliver quality water filtration at Frigidaire's specifications.
- Our Frigidaire Water Filters are tested rigorously to guarantee that they reduce contaminants, such as lead. So, not only do our filters provide you with fresh tasting water, they also ensure that your water is more pure and clean.

NSF Certified

- Using a consensus based process, NSF creates standards, test and certifications for food and water industries. The internationally recognized independent organization works to reduce the negative effects that unsafe products and processes have on our health and environment.
- PureSource® 3 carries the following NSF Certifications for refrigerator water filtration:
 - Standard 42: Certified to reduce chlorine taste and odor (and potentially chloramines, iron, manganese, hydrogen sulfide, pH neutralization and zinc reduction)
 - Standard 53: Certified for critical health claims (heavy metals, inorganics and volatile organic chemicals)
 - Standard 401: Certified for certain pharmaceuticals and emerging chemical compounds

Frigidaire PureSource Ultra® ULTRAWF

Product Description

- The PureSource Ultra® filter works with your Frigidaire refrigerator to give you clean, great tasting water and ice. It improves the taste of your water and reduces contaminants including lead, mercury, toxaphene, alachlor, atrazine, benzene, endrin, ethylbenzene, lindane, chlorobenzene, monochlorobenzene, atenolol, ibuprofen, and trimethoprim. It's easy to install the PureSource Ultra®. Push and release your old PureSource Ultra® filter, then push your new filter into place.
- The PureSource Ultra® filter lasts 6 months or for 200 gallons, whichever comes first.
- Frigidaire PureSource Ultra® is designed for use in select Frigidaire refrigerators with filtration systems located in the back, top right.

Genuine Frigidaire Filter

- For guaranteed performance, only use Frigidaire genuine water filters.

- PureSource Ultra® carries the following NSF Certifications for refrigerator water filtration:
 - Standard 42: Certified to reduce chlorine taste and odor (and potentially chloramines, iron, manganese, hydrogen sulfide, pH neutralization and zinc reduction)
 - Standard 53: Certified for critical health claims (heavy metals, inorganics and volatile organic chemicals)
 - Standard 401: Certified for certain pharmaceuticals and emerging chemical compounds

Frigidaire PureSource Ultra® II

EPTWUFU01

Product Description

- The PureSource Ultra® II filter works with your Frigidaire refrigerator to give you clean, great tasting water and ice. It improves the taste of your water and reduces contaminants including lead, mercury, toxaphene, atrazine, endrin, lindane, benzene, carbofuran, tetrachloroethylene, atenolol, estrone, naproxen, nonylphenol, phenytoin, and trimethoprim. It's easy to install the PureSource Ultra® II. Twist and pull your old PureSource Ultra® II filter, then push and twist your new filter into place.
- The PureSource Ultra® II filter lasts 6 months or for 200 gallons, whichever comes first.
- Frigidaire PureSource Ultra® II is designed for use in select Frigidaire refrigerators with filtration systems located in the back, top right.

Genuine Frigidaire Filter

- For guaranteed performance, only use Frigidaire genuine water filters.

Genuine Water Filter

How Our Trusted Filters Work to Keep Your Water Clean

Our Electrolux filters are so effective at reducing contaminants found in water because of the carbon block inside the filter. The specially prepared carbon is incredibly porous, giving it tremendous surface area to capture microscopic particles.

3 LEVELS OF FILTRATION

LEVEL 1

- As the incoming water passes through the carbon block, the larger particles get stuck outside surface. This removes sediment from the water.

LEVEL 2

- Some impurities, like chlorine, are reduced by a rapid chemical reaction upon contact with the carbon. This improves the taste and smell of the water.

LEVEL 3

- Then, the carbon block acts as a magnet for compounds like lead and VOCs, trapping the contaminants. This reduces potentially harmful substances found in water.

The resulting filtered water is now ready to be dispensed.

Electrolux Pure Advantage®

EWF01

Product Description

- The Pure Advantage® filter works with your Electrolux refrigerator to give you clean, great tasting water and ice. It improves the taste of your water and reduces contaminants including lead, mercury, toxaphene, alachlor, atrazine, lindane, atenolol, ibuprofen, and trimethoprim. It's easy to install the Pure Advantage®. Press the release button to remove your old Pure Advantage® filter cartridge, then slide and click the new filter cartridge into place.
- The Pure Advantage® filter lasts 6 months or for 400 gallons, whichever comes first.
- Electrolux Pure Advantage® is a cassette filter designed for use in select Electrolux refrigerators with filtration systems located in the front, top right.

Genuine Electrolux Filter

- For guaranteed performance, only use Electrolux genuine water filters.
- Imitation filters may display a lower price and claim to be compatible with Electrolux refrigerators, but only Electrolux genuine filters are guaranteed by Electrolux to deliver quality water filtration at Electrolux's specifications.
- Our Electrolux Water Filters are tested rigorously to guarantee that they reduce contaminants, such as lead. So, not only do our filters provide you with fresh tasting water, they also ensure that your water is more pure and clean.

NSF Certified

- Using a consensus based process, NSF creates standards, test and certifications for food and water industries. The internationally recognized independent organization works to reduce the negative effects that unsafe products and processes have on our health and environment.
- Pure Advantage® carries the following NSF Certifications for refrigerator water filtration:
 - Standard 42: Certified to reduce chlorine taste and odor (and potentially chloramines, iron, manganese, hydrogen sulfide, pH neutralization and zinc reduction)
 - Standard 53: Certified for critical health claims (heavy metals, inorganics and volatile organic chemicals)
 - Standard 401: Certified for certain pharmaceuticals and emerging chemical compounds
