*Breed recommendations are a guideline only as individual sizes may vary by dog.
We recommend you measure your dog to ensure the right fit.

Width Measurement

Measure around the widest part of your dog's nose, usually just below the eyes.

Length Measurement

Measure the distance from the tip of your dog's nose to the base of the nose, just below the eyes. As a guide, when fitted the muzzle length should cover approx. 2/3 of your dog's nose. The length measurement is the most important when fitting a muzzle.
