HOW TO USE

To start, you'll need a Febreze PLUG with Fade Defy Technology electric oil warmer and a scent refill. Unscrew the caps of the refill and set it into the warmer until you hear a click. Insert the warmer into any outlet, adjust your level of intensity, and enjoy that first-day freshness for 50 days.* With digitally controlled scent release, you get the same level of freshness no matter if it's day 1 or day 50.

TIP: Outlet upside down or sideways? No problem. Our PLUGs rotate. Move the warmer around until it's perfectly upright.

WHERE TO USE

USE in high-traffic rooms that need continuous odor fighting and continuous freshness.

DON'T USE in an unsafe outlet, on its side, or with any other non-Febreze pluggable.

WHEN TO USE

Put in any room of your home to fight unwanted odors. Then enjoy the same level of scent from day 1 to day 50. Bonus? The low-level indicator light flashes to let you know it's time for a new refill.
