

## **How to use:**

Beautifully smooth skin in just 3 steps:

1. Remove the plug from the pump and turn to unlock.
2. Pump the Veet Cream onto the spatula or your hand and spread evenly to fully coat the hair you want to remove but do not rub in. And don't forget to wash any cream off your hands.
3. Leave the cream on your skin for 5 minutes, and then use the spatula to gently remove a small test area of cream. If the hair comes away easily, use the wider or narrower end of the spatula, depending on the body part, to remove the rest. If your hair is more stubborn, you can leave the cream on for up to 10 minutes in total – but don't leave it any longer.

Rinse your skin thoroughly with water to remove the cream completely, and then dry.

Rinse the nozzle and the spatula thoroughly after use.

Replace the plug after each use.
