

TROUBLESHOOTING STEPS:

If your Bluetooth mouse or keyboard does not reconnect after a reboot at the login screen and only reconnects after the login, this might be related to FileVault encryption.

When FileVault is enabled, Bluetooth mice and keyboards will only re-connect after login.

Potential solutions:

If your Logitech device came with a USB receiver, using it will solve the issue.

Use your MacBook keyboard and trackpad to login.

Use a USB keyboard or mouse to login.

Note: This issue is fixed from macOS 12.3 or later on M1. Users with an older version might still experience it.
