

Can the Aqara Ceiling Light T1M be connected to the mobile phone directly?

The Aqara Ceiling Light T1M cannot be connected to the mobile phone directly.

An Aqara Zigbee 3.0 hub is required, please connect the Aqara hub with the mobile phone, and then connect the Aqara Ceiling Light T1M to the hub. (The supported hubs are Aqara Camera Hub G2H Pro & G3, E1 Hub, M1S Hub, M1S Gen 2 Hub, M2 Hub.)

What should you do if the Ceiling Light T1M cannot be found in the app?

Use the local physical switch to toggle the light on and off five times (on for 1 second, off for 1 second, repeated five times). A 'breathing' light indicates a successful reset.

After resetting, reopen the Aqara Home app and re-add the device.

How do you reset the Aqara Ceiling Light T1M?

To reset the light, use the local physical switch to turn the light on and off five times in succession (on for 1 second, off for 1 second, repeated five times). If the main light breathes twice, the reset is successful.

What is the maximum installation distance between the Aqara Ceiling Light T1M and the hub?

The recommended distance between the Aqara hub and the Aqara Ceiling Light T1M is no more than 10 meter (393 inches), without any obstacles.

Can the Ceiling Light T1M support delayed turning off and on?

Yes, the light supports a default light-off delay of 1.5 seconds. Users can customize the delay from 0 to 10 seconds according to their needs.

What should you consider when installing and using Ceiling Light T1Ms?

- 1) Always disconnect the power supply before installation to prevent electric shock.
- 2) Not all fixed bracket accessories may be necessary; select according to the installation environment's specific needs.
- 3) Do not replace the LED module or disassemble the product without authorization. If the equipment is damaged, contact professional after-sales service for assistance.

Does the colored ambient light (side light) of the Aqara Ceiling Light T1M allow for independent adjustment?

Yes, the main light and side light allow for independent control, including brightness adjustment and the setting of automation and other functions.

Why might the connection time out for the a new Aqara Ceiling Light T1M?

Connection timeouts can occur due to various reasons:

- A. If the network environment is poor, verify the router's configuration.
- B. If the Aqara Ceiling Light T1M is too far from the hub, resulting in poor communication, try moving them closer and attempt again.
