

Troubleshooting:

- Please make sure the film is being loaded correctly.
- Do not expose the film to light or extreme heat or cold
- Images taken in manner with over exposed for example straight into sunlight or not using the flash may cause the image to appear dark and faded
- Please refer to the manual of the device you are using to ensure you are using the film correctly.
- There are 4 x 10 shot foils provided with this product, you are requested uses a new foil pack to understand if there are any issues with the images. If you do face any issues this could be an issue with the device and not the film.
