

Feeding Instructions

Feed 1/3 - 1/2 can daily per 10 lbs of Adult dog. Refrigerate after opening (up to 3 days). Serve at room temperature.

Mix it up – Replace 1/3 can for each 2/3 cup of dry Pedigree Adult Complete Nutrition.

Transition Instructions

Mix with the present diet by one-quarter to three quarters to begin with (25% new to 75% old). Follow by a daily increase in the amount of the new product until your pet is eating only the new. This gradual approach, taken over a week's time, is usually more acceptable and avoids any digestive upsets a sudden change in diet may cause to your pet.
