

Step by step instructions on enabling Kevo Smart Home skill with Alexa

You will need the following hardware to use the Kevo Smart Home skill for Alexa:

1. Kevo Lock
2. Kevo Plus hub – sold separately
3. Alexa enabled device – Echo/Dot

To get started:

1. Install Kevo Smart Lock - check that the Kevo app is able to lock/unlock using Bluetooth.
2. Install Kevo Plus – check that the Kevo app is able to “remotely” lock/unlock.
3. Set up your Amazon Echo, Echo Dot or other devices with Amazon Alexa.
4. Enable the Kevo Smart Home skill in the Alexa app.
5. Link your Kevo smart lock account and discover the locks.

Once your account is linked, you can use the Kevo smart Home skill for Alexa on your Alexa enabled device

Interaction Examples:

Simply make the following asks to Alexa on your Alexa device:

Alexa, lock the front door.

Alexa, is the front door locked?

Alexa, is the front door unlocked?
