

HOW TO USE

- **Activate. Develop. Set.** Dispense onto fingertips and rub gently to release and activate encapsulated pigments. As the shade begins to develop from white to your shade, apply to moisturized face and continue to blend for even coverage. Watch as it adjusts to your skin to immediately blur imperfections and even skin tone. The shade is fully developed when product is no longer white. Allow 1-2 minutes for shade to adjust completely. Set with one of our Total Protection brush-on sunscreens or follow with foundation for full-color coverage.
- **Pro Tip:** Layer underneath your foundation for fuller color coverage or use with Face Shield Glow or Face Shield Bronze to enhance your look.
- **One and Done:** Evenly apply one layer to entire face, including under eyes for a look that's naturally you and powerfully protected.
- **The Foundation Replacer:** Build your coverage to your ideal level of flawless perfection. After applying your first layer, wait 1 minute before applying another layer.
