

## INFORMATION SHEET:

# HOW TO CARE FOR YOUR SUN HAT

### HOW TO REMOVE CREASES

You can fold or roll your hat while you travel, or if you would like to stash it in your purse or backpack. If you find any creases in your hat, don't worry! You can easily iron these out!

All you need is an ironing cloth and, of course, an iron. Place the ironing cloth between the hat and the iron to make sure that your hat is protected from damage. Iron out the crease, and VOILA! Your hat should be creaseless and ready to sport for your next adventure!

### WASHING INSTRUCTIONS

Wash this sun hat under a gentle cycle in warm water with a maximum of 30°C (86° Fahrenheit). We do not recommend putting this hat in the dryer. Lay it flat to dry.
