

How to use

Get your style

Shape your style and create root volume, soft curls, flips and waves by following these easy steps

Step 1 - Getting Started

Always towel-dry hair to remove excess water and detangle with a comb or brush.
Select the HIGH setting (II) for thick or coarse hair and the LOW setting (I) for fine or thin hair.

Step 2 - Start drying and styling

Blow dry each section lifting the hair from the root wrapping the hair around the barrel. To prevent over-drying, do not concentrate the airflow on any one area for too long.

Step 3 - Get the desired look

Repeat for the remaining sections until the desired look is achieved.
