

1. Question about Switching Between Win&Mac

Press **Fn+Win** will lock **Win**. If you press **Fn+Alt** to exchange the position of **Win** and **Alt** after that, it won't work.

2. How to open PS/2

In USB wired mode, press 5 seconds of **Fn+Back Space** until the light flash twice which means the PS/2 has automatically recognized USB plug in and out.

3. Two applications of Del:

① In wired mode, if you need to quick switch to another paired Bluetooth device, you can press **Fn+Ins/~ /F12/Del**(the stealth keycaps)

② When the battery is out or died, you can connect to a portable charger and press **Fn+Ins/~ /F12/Del**, then it will switch to Bluetooth mode powered by portable charger

Note: In both modes, when you press **Fn+F10/F11/F12** (1/2/3/Del/End/Pgdn for Pro Version), you can switch to the paired Bluetooth devices.

4. How To Know the Battery Level

NIZ PLUM 68/X87/X108 Bluetooth keyboard can press 3 seconds of **Fn+Y** to know the battery level. On the right corner of X87/X108, there are four lights to indicate the battery level (4 or 3 lights on means full, 1 means low battery). For 68 keyboard, 4 lights on means full and 1 light means low battery. If it flickers, then you need to charge it now.

5. How to Pair Bluetooth

1. Turn on the Bluetooth switch (press at least 1 seconds until it's on)
2. Long press 3 seconds of **Fn+1/2/3** until it flashes. Turn on Bluetooth on your PC and find the Bluetooth Keyboard and pair
3. If you have paired one device and need to pair another, please turn off the first device and the keyboard. Redo the pairing process, otherwise you might fail

Note: Below situation will have great interference on Bluetooth. Please avoid while paring

-using USB 3.0 port while pairing

-2.4G router

-Bluetooth speaker of earphone

-Rechargeable mouse or mouse pad, heating pad

6. How to Choose A Right Bluetooth Adapter

For devices have no Bluetooth, we strongly suggest you choosing NIZ Bluetooth adapter to avoid any issues

How to Use NIZ Bluetooth Adapter

- Insert the Bluetooth adapter in the PC, long press three seconds of the dot switch on adapter (to erase the previous pairing info)
- Press three seconds of Fn+1/2/3, and pair the keyboard with the Bluetooth adapter
