

Kraken Series Compatibility Guide

Updated: 2017/4/18

Due to limited resources, what NZXT did is only figuring out the **Cases Fan's Compatibility** of each cases instead of the liquid coolers' in this guide. We have done everything within our power to validate this guide, however we cannot guarantee fitment on any cases other than our own.

Before purchasing any NZXT Kraken Series products, there are 6 important things you have to know:

1. Decide the Kraken product will be applied to CPU or Graphics card.
2. Check the available positions and capacities (Top/Rear/Bottom/Front/Other) in your cases or cases you want to have.
3. Check the radiator type and thickness of Kraken products you want.
4. Make sure the available positions and capacities in 2 can 100% fit in those Kraken products.
5. Make sure there are no interference with Motherboards, ODDs, HDD cages, PSUs and any other components inside caes.
6. Seek for cases vendors' help if anything is unclear.
