Use this process to include new Z-Wave devices into your home Z-Wave network.

These instructions also apply to ZigBee devices.

To connect/include a device:

Within the SmartThings mobile app, follow these steps to connect or include a new device:

1. Tap Marketplace
2. Under **Things**, tap **Connect New Device**
3. The app will say, **I'm looking for your new Things...** and display a spinning circle
4. While the Hub searches, perform the connection/inclusion process specific to that device
     - Consult the device's manual for instructions
5. When the device is discovered, the message **# Thing(s) Found!** will increment and the device will list below
6. Tap the device to configure it
7. Tap to name the device
8. Tap **Select a Room** to assign the device to an existing Room or Add a Room
9. Tap **Next**
10. Follow the in-app prompts to configure the device
11. When you finish configuring the device, tap **Done**

Alternatively, you can connect a new device via the following methods:

1. Tap the menu ☰
2. Tap **Add Thing** ＋
3. Tap **Connect New Device**

OR:

1. Tap **My Home**
2. Tap the plus icon ＋
3. Tap **Add a new: Thing**
4. Tap **Connect New Device**

You can also explore and connect third-party devices that work with SmartThings, or look for a specific device you want to connect:

1. Tap **Marketplace**
2. Under **Things**, tap a category (e.g., SmartThings Recommends, Safety & Security, Health & Fitness, etc.)

3. Tap a device category (e.g., Open/Closed Sensors, Motion Sensors, Switches & Dimmers, Light Bulbs, etc.) to see a list of related SmartThings devices and third-party devices that are certified compatible
4. Tap the device manufacturer
5. Tap the device
6. Tap **Connect Now**
7. The app will indicate that the Hub is looking for a device of that type or name
8. While the Hub searches, perform the connection/inclusion process specific to that device
   ◦ Consult the device's manual for instructions
9. The app will indicate that the Hub found the device and direct you to configure it
10. Tap to name the device
11. Tap **Select a Room** to assign the device to an existing Room or Add a Room
12. Tap **Next**
13. Follow the in-app prompts to configure the device
14. When you finish configuring the device, tap **Done**

To view your connected devices:

In the SmartThings mobile app:

1. Tap **My Home**
2. Tap Things
3. All your connected devices will list here
4. Select a device to see more details, like its current status, recent activity, and associated SmartApps

After selecting a device, tap the gear icon ⚙ to edit, configure, or remove the device.

To remove a device:

1. Tap **My Home**
2. Tap **Things**
3. Tap the device you wish to remove
4. Tap the gear icon ⚙
5. Tap **Remove**
6. Confirm removal (this cannot be undone)

Tip: When connecting/including ZigBee and Z-Wave devices, start with the powered devices (repeaters) nearest the Hub and then work your way out. Next, connect battery-powered devices working from the Hub out. This will create the ideal mesh network.
