

How to attach the sprayer nozzle

			
Open flip cap.	Remove sprayer from slot in handle. Pull hose tip to <u>completely extend</u> tubing 3 feet.	Firmly press hose tip into opening on cap until it clicks into place.	Slide ON/OFF lever to 'OPEN' position. Rotate nozzle to desired setting SPRAY/STREAM.
AFTER USE: Turn sprayer nozzle to 'OFF' position, turn lever to 'CLOSED' position. DO NOT disconnect hose tip. TO AVOID LEAKAGE: Return sprayer to slot in handle. ALWAYS STORE IN UPRIGHT POSITION.			

Application: After showering, spray Wet & Forget® Shower on all surfaces to be cleaned. The next day, thoroughly rinse all treated surfaces. For best results leave on surface 8-12 hours (but no more than 24 hours). Rinse all shower and tub surfaces thoroughly before entering. For heavy build-up, several daily applications and a wipe down may be necessary. Once a clean shower or tub is achieved, begin weekly cleanings.

Use On: All your Bathroom surfaces except Natural Marble. Great for Showers, Tubs, Sinks, Counters, Glass Shower Doors, Toilets, Even Fabric Shower Curtains! Rinse Sinks, Counters and Toilets immediately after application. Test in a small inconspicuous area prior to use.

Shower Safety: Always rinse all shower and tub surfaces thoroughly prior to entry. Always stand on a non-slip surface.

Refill This Bottle: REMOVE top from empty spray bottle. Unscrew cap on refill and pour contents directly into empty bottle until full. Replace trigger sprayer.

Mold And Mildew Stains: Cleans mold and mildew stains on hard non-porous surfaces. When rinsing, a wipe down may be required. Will not remove mold and mildew stains from caulk or grout.

Hard Water/Mineral Deposits: In some cases, MAY NOT REMOVE hard water/calcium deposits (water spotting). Once cleaned, dark tiles may highlight calcium deposits. Clean hard water stains prior to or after using Wet & Forget® Shower.

Tough-To-Reach Areas: Wet & Forget Shower comes with a remote-spray trigger that allows you to pivot the trigger into any position to get to those tough-to-reach corners. Turn the sprayer upside-down and get the same product stream as the upright position. The Wet & Forget Shower trigger sprayer can spray up to 10 feet allowing you to clean those not so easy-to-reach areas without bending, stretching or simply having to ignore them.

Starting With a Dirty Shower: If you're starting with a dirty shower, no problem! Wet & Forget Shower goes to work on contact getting rid of soap scum, grime, oils, mold and mildew stains. Simply apply Wet & Forget Shower after the last shower of the day and let it sit until the next day. Rinse the shower and, if necessary, give it a quick wipe-down. If there are still signs of shower grime, repeat the same routine daily until clean. No scrubbing required! Once you achieve a clean shower, you'll only need to apply Wet & Forget Shower one time per week to maintain a clean shower.
