

AQUASURE DELIGHT RO + UV + UF + MTDS BASED MULTI-STAGE PURIFICATION WATER PURIFIER

3

CHECK POINTS BEFORE CALLING OUR SERVICE CENTRE		
Problem	Check Points	Solutions
Water tastes bad	<ol style="list-style-type: none"> Is the storage tank clean? Have you kept the purified water in the tank too long? Is it time to change filters? 	<p>Clean the storage tank. Discard water and clean the tank. Call our service department to change filters.</p>
There is too much (or too little) water being purified	<ol style="list-style-type: none"> Is the tap water valve closed? Is the water temperature too low? Are the filters clogged or damaged? 	<p>Open the tap water valve. If so, the amount of purified water will be reduced. Call our service department and change filters.</p>
Water doesn't come out	<ol style="list-style-type: none"> Is there water in the tank? Is tap water supplied? Is the tap water valve closed? Has raw water is wrong? 	<p>Check the storage tank. If tap water is not supplied ensure supply is on. Open the tap water valve. Call our service department.</p>
Water is leaking	<ol style="list-style-type: none"> Is water coming out of the top cover of the purifier? 	<p>After checking the inside of the product, close the tap water valve, unplug the power cord and call our service department.</p>

PRECAUTIONS IN USING THE PURIFIER		
PRECAUTION	LIKELY PROBLEM IF NOT FOLLOWED	
After installation, empty purified water for the first time before using the purifier.	First filling of water may contain smaller particles of manufacturing debris of filters. Though these are not harmful, recommended to discard.	
Do not place any heavy or sharp objects on top of the purifier.	Scratches will develop on the surface. Heavy objects might lead to damage of the body.	
Drain the water in the tank before reusing the purifier if it hasn't been used for over 2 days.	Stagnation might have caused contamination if the lid is not properly placed. Recommended to discard the stored water.	
Change filters.	Filtration will get affected. TDS reduction may not be consistent.	
Clean filters to make the purifier work best.	Filtration time would increase.	
Keep the environment clean for the purifier. While cleaning make sure that water doesn't leak into the purifier.	External contamination is a likely occurrence.	
If the supply cord is damaged, it must be replaced by a service agent or a similarly qualified person.	Leads to electric shock.	
Do not keep lit objects like candles on the product.	Can completely burn the product.

PURITY ALERT

"Your Delight RO+UV+UF+MTDS comes with a fail-safe feature by stopping the water flow in case of any error in UV purification. If the purifier keeps continuously and stops functioning, please contact Eureka Forbes Customer care No. - 18602661177."

MAINTENANCE

• Replace the filter at following periodicity.

1. UF Filter (Carby Cartridge)	6000 litres	4. Post Carbon	6000 litres
2. Chlorine Block	6000 litres	5. UV Lamp	3000 burning hours (as per UV Lamp manufacturer's specifications)
3. RO Membrane	6000 litres	6. UF Cartridge	6000 litres

Note: i. Please refer standard test conditions* for filter life.
ii. Ideally approx. 600 ml of water flows per minute from the reject water tube when the unit is working. If the flow reduces, please contact our service centre.
iii. 6000 litres is approximately 360 litrags of storage tank. Even if you fill the storage tank twice a day the filters will last for 1 year.

Disinfection & Cleaning of Storage Tank

Note: Storage Tank of the product must be periodically (at least once in every 30 days) cleaned by a disinfectant. Disinfection tablets may be purchased from the company authorised service centre. Please follow the disinfection process strictly per the instructions as provided in the User Manual.

- Switch Off the power supply to the purifier when the tank is full. Stop the water supply to the unit by removing the raw water inlet pipe from the Diverter Valve. Remove the top cover of the purifier unit.
- Disinfect the pure water inlet pipe of storage tank.
- Drop one disinfection tablet into the opening of the inlet connector of tank. CAUTION: Keep the disinfection tablets out of reach of children. Do not eat / consume this disinfection tablet.
- Snug fit the pin and leave the unit for 30 minutes.
- After 30 min. open the faucet and discard the purifier tank water completely. CAUTION: Do not drink this water. Check if the tablets have completely dissolved. If not, then discard the leftover pieces of tablets.
- Switch On the power to the unit and insert back the raw water inlet pipe into the diverter valve as it was before.
- Let the purifier tank get completely filled. Discard this fill too.
- Allow the tank to get filled again. Now your Delight RO+UV+UF+MTDS is ready for use. You can start using this water. In case you notice any medicinal taste (small when discard the water and let it re-fill again).
- Please ensure that the disinfection process is carried out by the authorised installation person / service technician during first installation and in every subsequent mandatory servicing of your product.

TERMS OF WARRANTY

Your Aquasure Delight RO+UV+UF+MTDS Water Purifier is warranted against defects arising from faulty design, workmanship and materials, for a period of 12 months from the date of invoice, subject to the following conditions:

- The customer will notify the Company promptly about any defects noticed and give the Company or its Authorised Dealer adequate opportunity to inspect, test and remedy them, for which the customer will deposit the goods if necessary, with the Company's office / service centre along with the original invoice, in the city where they are sold.
- Inspection and Test Report of the Company's official service centre will be treated as final and binding under the Warranty for determining defects, repairs/ alterations required or carried out, or certifying working of the goods thereafter.
- The Company or its Authorised Dealer will be entitled to retain any defective part replaced under the Warranty.
- The Company's liability under the Warranty will be limited only to defects which occur under conditions of normal operation and under proper use. It excludes defects occurring because of abuse, faulty care or maintenance, repairs/ alterations to goods or parts by others.
- Consumables such as Pre-Filter, F Fine Sediment Filter, Activated Carbon UF Cartridge and Post Carbon Cartridge which are subject to normal wear and tear in the course of use are not covered under this Warranty.
- Reverse Osmosis Membrane warranty is for a period of 1 year (or) 6000 litres (whichever is earlier) from the date of installation, on the condition that the input water is as per the standard test condition* mentioned in this user manual. If the RO Membrane gets clogged within warranty period, it will be cleaned/ repaired/ replaced free of charge as deemed fit by the company authorised service person / centre after inspection.
- The customer will have no claim under this Warranty in respect of any personal injury, damage to property or consequential damages, or for utilisation of the goods not in accordance with the User Manual.

Note: The expressions hereunder should have the following meaning:
The 'Goods' that mean goods described in the Purchase Agreement.
The 'Customer' shall mean the original purchaser under the Purchase Agreement.
The 'Company' shall mean Eureka Forbes Limited.

N.B: For registration of the Warranty, please fill up the details in the Warranty Card and mail the same to Eureka Forbes Limited.
