

Longer, Thicker Looking Lashes 100% All Yours

Created with a proprietary blend of vitamins, peptides, and amino acids, our award winning eyelash enhancing serum gives your lashes a fuller and thicker look. GrandeLASH-MD is safe and effective and results can be seen in as little as 4 weeks, with full results in 3 months.

Lash Extension Safe | Safe For Contact Lenses | Cruelty Free

Beauty Tips:

1. Remember, you're applying to the skin closest to the lashes, not the actual lashes
2. When applying the product, make sure it does not get into the eye
3. You don't need multiple applications or double dips, using more than instructed will not yield quicker results.

How To:

After cleansing & drying your face, apply GrandeLASH-MD using a single stroke on your eyelid just above your upper lash line like a liquid eyeliner. Use once daily in the evening before bed. Allow 1 to 2 minutes for the serum to dry.

Maintenance:

In order to receive the full treatment, use the entire tube of product (a 3 month supply). Once desired results are achieved, apply every other day. GrandeLASH-MD requires continued use to maintain your results.

Do Not Use If:

- You are pregnant, nursing, undergoing chemotherapy,
- or under the age of 18
- The outer seal is missing or no longer intact
- When your eyelid is injured, scraped, or inflamed

Discontinue use if skin irritation or redness occurs.

Como Usar:

Después de limpiar y secar su rostro aplique GrandeLASH-MD al párpado en la base de sus pestañas como si fuera delineador líquido. Use el suero 1 vez al día antes de acostarse y permite 1 a 2 minutos para que se seque.

Mantenimiento:

Para obtener resultados completos use una botella entera (3 meses). Después de lograr sus resultados solo use el suero cada día por medio. GrandeLASH-MD requiere uso continuo para mantener los resultados.

No Use Cuando:

- Está embarazada, lactancia, menor de 18 años o recibiendo quimioterapia
- El producto no tiene el sello de seguridad o si este no se encuentra intacto
- El párpado esta lastimado, lesionado, o inflamado

Discontinuar el uso si se produce enrojecimiento o irritación a la piel.
