Feeding Guidelines

Weight of Dog (lbs.) Maintenance—Feed Daily

50 lbs.	2 2/3 - 3 c
60 lbs.	3 - 3 1/2 c
70 lbs.	3 1/2 - 4 c
80 lbs.	3 3/4 - 4 1/2 c
100 lbs.	4 1/2 - 5 1/4 c
120 lbs.	5 1/4 - 6 c
140 lbs.	5 3/4 - 6 3/4 c

c = cups; 1 cup = 100 grams

These guideline amounts are a starting point and your dog may need more food depending upon age, activity, and temperament. In order to reach optimal body condition, you may need to adjust food intake. This represents the total recommended volume of food per day. You should divide

the total recommended feeding amount by the number of times you feed your dog per day to get the actual portion size per feeding.

Large-breed puppies, reaching 51 to 90 lbs. at maturity, should transition to IAMS ProActive Health Large Breed formula at 12 months of age. Giant-breed puppies, over 90 lbs. at maturity, should transition to IAMS ProActive Health Large Breed formula at 24 months of age.

Remember to have clean, fresh water available for your dog at all times.

Because IAMS ProActive Health Large Breed dog food is complete and balanced for adult dogs, you do not need to add vitamin or mineral supplements.

When introducing IAMS dog food, gradually mix it with your dog's current food over the course of 4 days.

[Mix with wet](#)

Replace 1 1/4 cup (124g) for each can of Iams with Chicken and Rice (375g can).
