

Accepted by the National Eczema Association

All of our sensitive skin products have the National Eczema Seal of Acceptance. Products eligible for the NEA Seal of Acceptance™ are those that have been created or intended for use by persons with eczema or severe sensitive skin conditions. In order to qualify for the seal, products must meet the Seal of Acceptance™ criteria and pass the NEA Seal of Acceptance™

Application Process. NEA Seal of Acceptance™ criteria includes a list of ingredients that should be avoided because they contain known irritants and, depending on the product, the NEA Seal of Acceptance™ Review Panel considers testing data on sensitivity as well as the ingredients and formulation data.
