HOW TO USE THIS JEWELRY BOX

1. Ring pad

Specially designed to secure and protect your precious ring, it usually consists of a set of flannel sponge pads. In addition to placing the ring, it is also a good choice to put cufflinks or earrings, white velvet can protect the hands, more care for your baby.

2. Stud fixing hole/stud fixing pad

Specifically designed to secure and protect your stud jewelry, it is usually equipped with stud holes in the divider to secure the earrings, or with an ear holder in the box lid position, or with a removable liner with stud holes in the compartment.

3. Watch bag/bracelet bag

Designed to secure your bracelet or watch.

4. Necklace hook

A necklace, bracelet, etc. designed to secure and protect you, usually in the form of a buckle or hook. It is usually equipped with a dark bag with an elastic opening underneath to hold the dangling necklace.

5. Small cubicle

There are various sizes and shapes of small compartment design, so that your precious jewelry can be placed separately. Usually the thin design is prepared for necklaces, while the square is prepared for bracelets, brooches, earrings, bobby pins, cufflinks and other accessories according to the size and shade.

6. Jewelry bag

The design makes full use of the inner cover or side space to effectively expand the capacity of your jewelry box. You can hide your favorite pearl necklace inside, or hang a whole row of earrings, and how you use them is up to you.

7. Handle

Easy to move your jewelry box.

8. Mirror

Easy to view your jewelry wear.

9.The function of metal jewelry box inside the wire

(1) Positioning

The jewelry won't go anywhere in there.

(2) Protect jewelry
