

Product care & maintenance

When washed properly, microfiber bedding can last many washes. Follow these simple tips to maximize the life of your microfiber bedding.

Washing

- Machine wash cold on permanent press or gentle cycle
- Wash separately with like colors
- Do not mix with terry/cotton sheets to avoid lint

Detergent

- Use a mild detergent
- Do not bleach
- Do not use fabric softener – this will pill fibers

Drying

- Tumble dry low, remove promptly
- Do not iron or dry clean - high heat melts fibers, making them rough
