Setup and Storage

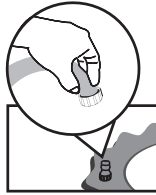

IMPORTANT:

1. Turn the faucet gradually to fill the sprinkler pool. Never go more than halfway on.
2. Turning the faucet all the way may cause the sprinkler pool to leak or burst.
3. Strictly avoid standing, walking, jumping or running in the sprinkler pool.

NOTE: All drawings are for illustration purposes only and are not made to scale. The drawings may not reflect the actual product. Inspect the sprinkler pool before each use for holes, wear and tear and other damages. Never use a damaged sprinkler pool.

①
Rinse before use.

②
Screw your garden hose
into the sprinkler pool
connector.

- Turn on the water slowly to allow water to gradually fill in.
- Adjust the flow to control the spray intensity. Ensure that the water is flowing for the built-in sprayers to work.
- Once done using, completely drain the inflatable wall of water inside. Make sure that the sprinkler pool and all other parts are completely dry before storing them.
- Store the sprinkler pool in a dry and shaded place under 104 degrees Fahrenheit (40 degrees Celsius).
- Sprinkler pool comes with a standard 3/4" connector to fit most common USA garden hoses.
- Store the sprinkler pool and accessories in a dry and shaded place under 104 degrees Fahrenheit (40 degrees Celsius).
