

Anker MagGo Wireless Charging Station (Foldable 3-in-1)

User Guide (A2557)

Using Your Product

Wirelessly charge your iPhone, AirPods, and Apple Watch simultaneously.

FAQ

1. Is the product safe to use when it gets warm/hot?

It's normal for wireless charging to warm up slightly, especially during intensive use such as long gaming or streaming sessions. This product uses metal materials to improve heat dissipation for faster charging, which may make it feel warmer to the touch. However, it complies with international safety standards, including EN 62368-1 and IEC 62368-1, ensuring safe usage. This product also meets specific safety standards in the USA (UL6238-1), Canada (CSA 62368-1), Europe (EN 62368-1), Japan (J62368-1), Australia and New Zealand (AS/NZS 62368-1), and more.

2. Can a phone case affect wireless charging?

For the best wireless charging experience, we recommend using Apple's official magnetic phone cases. You should avoid cases thicker than 2.5 mm and non-magnetic cases, as they may affect charging efficiency.

3. What is the adjustable angle range of the phone charging module?

To enhance your experience in both horizontal and vertical screen orientations, Anker MagGo Wireless Charging Station (Foldable 3-in-1) is designed with a maximum folding angle of 60-70 degrees. Its seamlessly adjustable design makes it easy for you to find your ideal viewing position.

4. Can the Anker MagGo Wireless Charging Station (Foldable 3-in-1) charge the Apple Watch Ultra?

Anker MagGo Wireless Charging Station (Foldable 3-in-1) offers compact, portable charging. However, its design may prevent charging the Apple Watch Ultra when the phone module is closed and the watch module is fully extended. Other Apple Watch models charge normally. For Apple Watch Ultra, adjust the watch module's angle for successful charging.

Specifications

Input	40W
Output	15W Max/5W Max/5W Max (Phone:15W Max /Apple Watch:5W Max /TWS:5W Max)
