

Blackjack Peek Mirror Manual

Overview

The Blackjack Peek Mirror is designed to help dealers discreetly check their hole card without revealing it to players. It uses a system of mirrors to reflect the value of the face-down card, allowing the dealer to determine if they have an Ace, a face card, or a 10.

This device is compatible with both Standard and Jumbo font playing cards. No specific card style is required for it to function properly.

Dealer Precaution

To prevent players in positions 1 or 7 from seeing the reflection, the dealer should shield the sightline by placing a hand near the mirror while checking the hole card.

Installation Instructions

The Blackjack Peek Mirror must be installed into your blackjack table.

Device Dimensions:

- **Exterior Plate:** 74mm x 39mm
- **Lower Cavity:** 38mm x 27mm

Table Preparation:

1. **Cut a rectangular hole** measuring **38mm x 27mm** into the table to fit the device's cavity.
2. **Position the device** parallel to the dealer's tray, ensuring:
 - The mirror is on the left side of the dealer's hand.
 - The bubbled section is on the right.
 - There is enough space for the dealer tray to fit properly.
3. **Trim the foam and playing surface** around the hole to accommodate the device.
4. **Secure the device** using the provided screws. It is recommended to pre-drill the holes with a **3/32" drill bit** before attaching the screws.

Once installed, the Blackjack Peek Mirror provides a seamless and secure way for dealers to check their hole card.
