

# Updating AppsLib on your Coby Kyros

From time to time, updates will be made available for the AppsLib market application. You will need to download and install the update to continue using the AppsLib market.

The Coby Kyros must be connected to the Internet in order to complete the update.

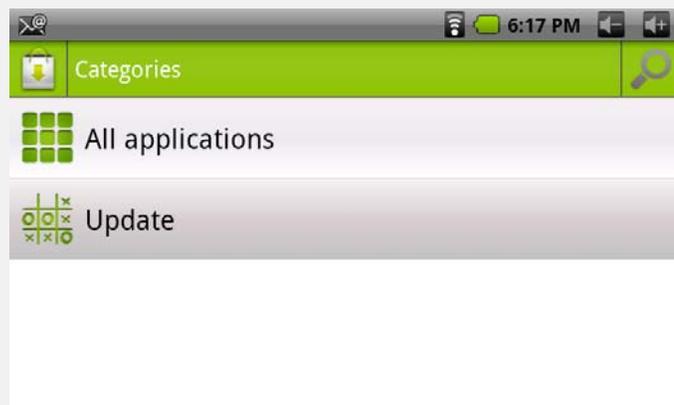

## To update AppsLib:

1. Touch the AppsLib icon on the Home screen or the Launcher screen to start the AppsLib application.

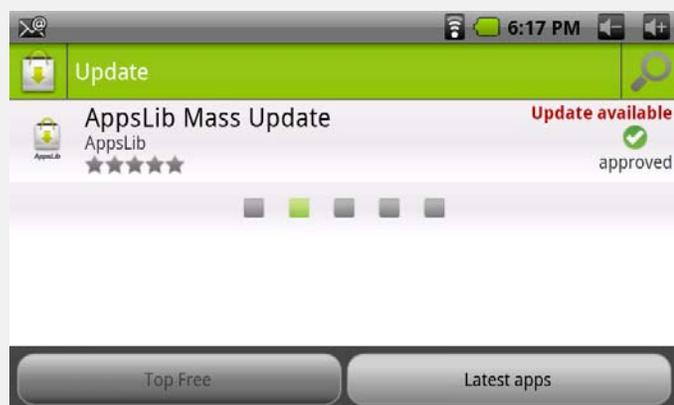

2. When an update is available, you will see an **Update** option.

Touch **Update** to continue.

3. AppsLib will find and display the update app.

Touch **AppsLib Mass Update** to continue.

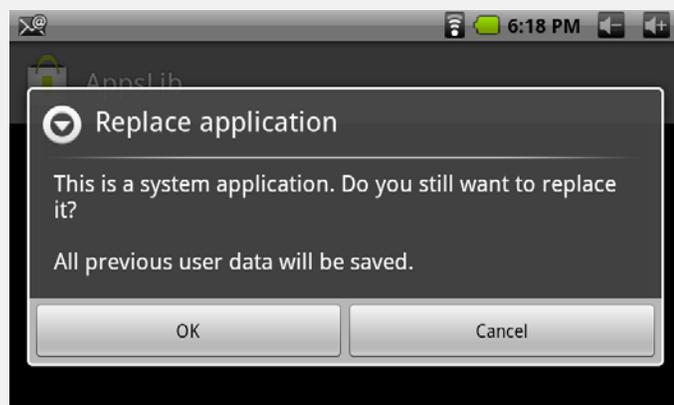

4. The AppsLib Mass Update detail page will appear.

Touch the **Update** button to continue.

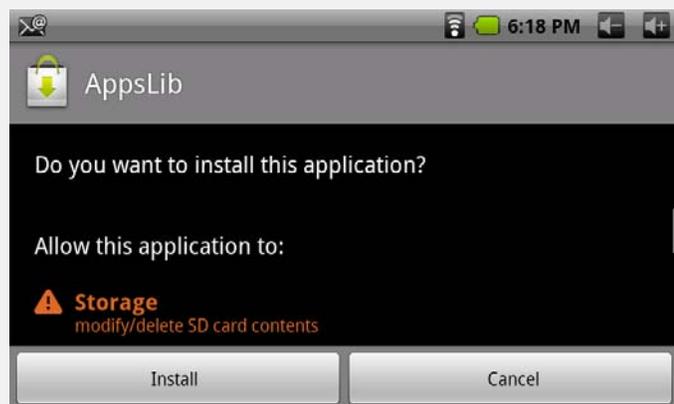

5. A confirmation request will appear.

Touch the **OK** button to continue.

6. The AppsLib updater will tell you which functions of the tablet it needs to control.

Review these access requirements, and then touch the **Install** button to continue.

7. The AppsLib updater will tell you when the update is complete.

Touch the **Open** button to launch the updated AppsLib application.
