
USAGE INSTRUCTIONS AND CARE

Do

- Use in electric oven, convection oven, microwave oven, fridge and freezer.
- Pre grease your dish before pouring in food meant for baking.
- Pre heat oven before use for best result.
- Allow frozen dish to reach to warm a bit before putting it in the oven for reheating (however, straight from the fridge to the oven is ok)
- Allow hot dish with food to cool a bit before putting it into the freezer (putting a hot dish into the fridge, however, is ok)
- Wash with soap and a soft sponge, or in the dishwasher

Don't

- Do not use over direct flame.
- Do not allow the food to dry completely in the oven.
- Do not put the hot dish on cold or wet surface.
- Do not use abrasive cleaners or scourers to ensure scratch free surface.
- Do not use the plastic lid in conventional oven or microwave oven. It is not recommended that plastics be heated, as research shows that the plastics leach chemicals at a higher rate when heated.
