

What can I use my Philips SmartClean System for?

If you are curious about the functionality of your Philips SmartClean System please read further on.

Uses of the Philips SmartClean System

The Philips SmartClean System can be used to charge, clean and lubricate your Philips Shaver. The SmartClean Plus (model number 5.2) also comes with a drying program.

The Philips SmartClean 5.1 system is compatible with all Philips shavers in **Series 7000** and **Series 5000** (S51xx - S56xx).

The Philips SmartClean 5.2 system is compatible with all Philips shavers in **Series 9000**.

Can I charge my Philips shaver after every shave?

Yes, you can recharge your shaver after every shave. The battery in your Philips shaver is a lithium-ion battery which allows you to recharge it every day.

When should I replace the cartridge of my Philips SmartClean system?

If you would like to find out when to replace the cleaning cartridge from your Philips SmartClean system for shavers, please read below.

Replacing SmartClean cleaning cartridge

We recommend replacing the cleaning cartridge of your Philips SmartClean system when the arrow symbol on your device flashes orange or when you are no longer satisfied with the cleaning performance of your SmartClean.

If you use the SmartClean system weekly, then the cleaning fluid in a cartridge should be enough for three months. If you are a more regular user, then the cartridge will need to be replaced much earlier, possibly within a month.

If you see the orange replacement icon flashing on your SmartClean station but there is still some fluid left inside the cartridge, please still replace it. This level of fluid is insufficient for the SmartClean to perform effectively.

The Philips SmartClean cartridge comes with a special cleaning fluid designed for this device. Please do not try to refill the cartridge with a different kind of cleaning solution. This can damage your device.

To buy the replacement cartridges for your Philips SmartClean system, visit our [online shop](#).

How to replace the Philips SmartClean cartridge

To replace the Philips SmartClean cartridges please follow the simple steps below:

1. Pull out the little compartment at the bottom of the SmartClean system.
2. Take the SmartClean cartridge out and discard it.
3. Get a new cartridge, peel its cover open from the top and place it back in the slot.

Your SmartClean system should now be ready to use with your Philips Shaver.
