

Bar Stool Guide

If you have the below table, bar, or counter height, please get the chairs or stools with the following height:

Table 28" to 30" H ----- Chair 17" to 19" H

Counter 35" to 37" H ----- Stool 23" to 28" H (Counter Height Stools)

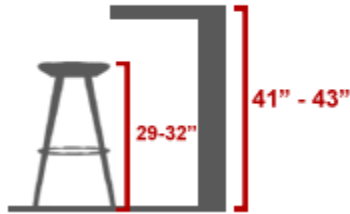

Bar 41" to 43" H ----- Stool 29" to 32" H (Bar Height Stools)

Bar 44" to 47" H ----- Stool 33" to 36" H (Extra Tall Bar Stools)

Counter Height Stools

Bar Height Stools

Extra Tall Stools

There should be an 11" to 13" space between the seat of the stool or chair and the table surface.

To determine how many stools you need to fit your bar or counter, measure the length of the bar in inches and divide by 24. You should allow 24" of counter length per stool, with or without a back. Example: You would need four stools for an 8' counter.
