

Which Gillette blades fit my razor handle?

For the best shaving performance, we recommend using blades that are designed for your razor handle. To find this information, visit the product detail page for your specific razor, or if you're interested in learning about all of the blades that are compatible with your razor handle, check out the chart below or download the complete list.

 Razors	Fits all MACH3, MACH3 Turbo, and Gillette3 blades
 Razors	Fits all Gillette3, MACH3, and MACH3 Turbo blades
 Razors	Fits GilletteLabs Heated Razor refills blades

What is the difference between Gillette Power razors and non-Power razors?

Gillette makes power razors that have the same core elements as a manual razor, but will vibrate when turned on. The power razors require a AAA battery and can be activated by pushing the power button on the handle. The power razor will automatically shut off after 8 minutes, but can be turned on again. All power razors are Shower-safe®. Additionally, all power razor cartridges are interchangeable with their base manual cartridge, and in the case of the Fusion family of razors (Fusion, ProGlide, and Styler), all Fusion cartridges will fit all Fusion handles.

Are used Gillette blades and handles recyclable?

Yes! Gillette and Venus partners with TerraCycle to collect and recycle blades and razors. Through the program, you can recycle your used blades and razors (Gillette & Venus products – and ALL other brands too!). You can collect blades and razors at home and mail directly to TerraCycle for recycling or drop off at a public collection bin near you. You can also become a community recycling solution by signing up to manage a public collection bin for you and your community – think college campus, office, or gym.
