The Schlage Lock Company, LLC reserves the right to make changes in designs and specifications or to make additions or improvements on its products without notice and without incurring any obligation to incorporate them on products previously manufactured. The Schlage Lock Company, LLC is not responsible for any modification, addition or alteration to our products by others.

DISTRIBUTION FUNCTION AND LOCATION POLICY

The Schlage customer relationship includes the nonexclusive area of primary sales responsibility and the channel of distribution assigned by Schlage. It is vital to our success and for the effective management of the distribution of our products that the Schlage customer relationship, once it is satisfactorily established between us, should not be changed without our approval. Therefore, after selection by Schlage as a distributor of one or more of Schlage products, a customer should continue to perform that distribution function from the location of its business at the place or places utilized at the time of selection. A customer should not change its Schlage distribution function or establish a different or additional location without the prior written consent of Schlage.

Schlage reserves the right to discontinue, after appropriate notice, sale of its products to any customer which refuses to adhere to this policy. Schlage also reserves the right to change, in its sole discretion, the number and locations of the distributors authorized to distribute its products in any area. This determination will be based upon, among other considerations, the success or failure in developing the market for Schlage products.

HARDWARE FINISHES

Schlage Lock finishes are durable, top quality finishes obtained by the careful processing of solid brass, bronze, stainless steel or other materials. Where required, a protective clear coating is applied and cured under high temperature. It is important

Terms & Conditions

that climatic conditions and usage be taken under consideration when selecting finishes. This is especially true in areas subjected to strong corrosive vapors, humid climate or sea air which, in a short time, may have a damaging effect on metal finishes. The longevity and preservation of the finish appearance is determined by base metal and finishing process. Clear protective coating or other organic finishing applications may require different methods of cleaning and care. As an example, non-clear coated finishes should not be cleaned with soaps or any solvents; organically coated surfaces should periodically be cleaned with a mild, nonabrasive soap and buffed lightly with a clean cloth. The type of base metal and finishing techniques must be considered when applying any cleaning or preservative method. Contact the Schlage Technical Services Department for further information on the care of finished hardware.

In some instances, for customer convenience, the most appropriate BHMA finish symbols are used to indicate similarity of appearance, regardless of base metal of finishing process. A, AL, D, ND, F, FA, H, S, S200-Series and Dexter by Schlage levers are zinc-based material and are plated to match finishes indicated. Finishes of latches, strikes, cylinders/cores, and visible mounting screws, though similar in appearance, may differ from the finish of the trim. Finish numbers in the 600-Series are the BHMA (Builders Hardware Manufacturers Association) industry standard.

Finish Codes and Descriptions:

* Oil rubbed bronze (613) is considered a category "B" finish by ANSI/BHMA and will vary in color when applied to different alloys and forms of base material. 613 will also vary from production lot and additionally from one manufacturer to another. Oil rubbed bronze will wear off over time due to the "rubbed" finishing method that has no protective coating or plating.

Dexter J Series Grade 3 finishes have durable, top quality finishes obtained by the careful processing of solid brass, stainless steel or other materials. Where required, a protective clear coating is applied and cured under high temperature. It is important that climatic conditions and usage be taken under consideration when selecting finishes. This is especially true in areas subjected to strong corrosive vapors, humid climate or sea air which, in a short time, may have a damaging effect on metal finishes. The longevity and preservation of the finish appearance is determined by base metal and finishing process. The type of base metal and finishing techniques must be considered when applying any cleaning or preservative method. Contact the Schlage Technical Service Department for further information on the care of finished hardware.

In some instances, for customer convenience, the most appropriate Builders Hardware Manufacturers Association (BHMA) finish symbols are used to indicate similarity of appearance, regardless of base metal of finishing process.
