

Peugeot Saveurs – After Sales Service

Use and Care:

Use:

- **Spices:** each mill is specific to one kind of spice. Make sure that the spice is correct: salt in the salt mill and pepper in the pepper mill.
- **Pepper:** use black, white or green peppercorns, and coriander up to 6mm in diameter. 15% of pink corns can be used in a pepper blend.
- **Salt:** with the stainless steel mechanism, only use rock salt (mine salt) up to 4mm in diameter. Do not use sea salt, wet salt, even dried (Guerande, Fleur de Sel, etc.).
- **Humidity:** never expose the mill to a wet surface or the wood and paint will crack which is not covered by the warranty.
- **Cleaning:** remove the head and completely empty the mill; clean the mechanism with a soft and clean brush. On the exterior, use a soft dry cloth like a microfiber cloth.

Fill the mill:

- Remove the knob then the head
- Fill the mill (3/4th of the reservoir)
- Put the head and knob back in place

Adjust the grind:

- **With the knob*:** the tighter the knob, the finer the grind and vice versa..
- **With the u'Select system**:** turn the u'Select system for a coarse or fine grind. Stop on markings or anywhere in between.

Electric mills:

- if the mill doesn't work, check:
- The position and condition of the batteries
- The contact quality, if the batteries have leaked
- That the mill is closed (lock position)

Parts and spices: rock salt, spices, bulbs, knobs and chargers are available on demand at our website www.peugeot-saveurs.com
